

# #GetYourNewView

## What's all the hubbub?

Yes indeed, it's October already, and like clockwork Microsoft has released a new version of D365 Business Central! Called 2020 Wave 2, or BC 17, it's chock-full of new features, enhancements, and tools for the end user and system admin.

Even before the release the New View team was diving into the release notes and testing the new version, and they've compiled a rundown of their highlights and favorite new items. Check out our blog and YouTube videos by clicking on the screenshots below. If you'd like to discuss what strategic capabilities you could drive with this new version, [let us know!](#)

## Free help with NAV / Business Central?

The next Business Central Mix It Up is coming up on Wednesday, October 28 at 4:00 EDT. It's a free monthly community event to share tips on using D365 Business Central you can use immediately. Led by former users, it's a great place to ask questions and share your insights. All roles and versions are welcome!

On this call you'll hear about the wide range of Community Resources available to all NAV and Business Central users. [Register on Meetup soon!](#)
